

BUTTE COLLEGE

COURSE OUTLINE

I. CATALOG DESCRIPTION

NSG 60 - Maternity Nursing

2 Unit(s)

Prerequisite(s): NSG 54, NSG 55, NSG 56, NSG 57

Co-requisite(s): NSG 62, NSG 63, NSG 66, NSG 70

Recommended Prep: NONE

Transfer Status: CSU

34 hours Lecture

This course prepares the Associate Degree Nursing student to care for clients in the maternity setting. The focus is on family centered maternity nursing beginning in the prenatal period through the care of the family in the postpartum period and care of the newborn. Using a nursing process approach, study includes normal and high risk maternal care and normal and high risk infant care. In addition, content related to the male and female reproductive system is addressed. Graded only.

II. OBJECTIVES

Upon successful completion of this course, the student will be able to:

- A. Identify principles of effective communication that demonstrate caring, sensitivity, and cultural awareness for clients in maternal-newborn settings and with reproductive system disorders.
- B. Describe the nursing and medical management for clients with reproductive system disorders.
- C. Categorize principles of assessment based on functional health patterns for clients in maternal-newborn settings and with reproductive system disorders.
- D. Utilize critical decision making skills to discuss the health care for clients in maternal-newborn settings and with reproductive system disorders.
- E. Describe caring interventions for clients in maternal-newborn settings and with reproductive system disorders.
- F. List and describe principles of teaching and learning for clients in maternal-newborn settings and with reproductive system disorders.
- G. Describe the nursing and medical management for clients with low risk pregnancy, and labor, and delivery.
- H. Describe the nursing and medical management for clients with high risk pregnancy, and labor, and delivery.
- I. Describe nursing care and medical management for the low and high risk newborn.
- J. Explain cultural care considerations for clients in the maternal-newborn setting, and with reproductive disorders.
